

THE DUALCOM PRO RANGE

No Wires . No Wait . No Worries

DualCom Pro offers Installers easier, faster installation of professional signalling systems with even greater resilience. It also provides access to CSL Live, our brand new device management portal and App. The range includes:

DigiAir Pro - our single path solution that utilises a Radio path to signal an alarm.

DigiAir Pro Radio uses a 4G WorldSIM to send its signal. Every DigiAir Pro is supplied with a network diverse standby WorldSIM to safeguard your system. Signals will be sent via this standby SIM, should the primary SIM lose its connection.

GradeShift Pro - our dual path solution that utilises a combination of two Radio paths or one Radio and one LAN path to signal an alarm.

GradeShift Pro Radio/Radio uses two active 4G WorldSIMs, one as the primary and one as the secondary path. Each SIM operates on an independent network from the other and their own radio module for total resilience.

GradeShift Pro LAN/Radio uses LAN connectivity for its primary path and a 4G WorldSIM as its second path. A standby WorldSIM is also supplied.

DualCom Pro Features

Product	EN Grade	Catastrophic Failure Reporting	EN50136 & PD6669:2017 Approved	UDL Available	Dual or Single Path	4G WorldSIMs Included	Paths Available
